

Internships, Master/PhD in **Molecular Biophysics**

We are a young and dynamic group interested in studying DNA break repair and Chromosome organisation at the single-molecule level, using

- * Atomic Force Microscopy
- * Optical Tweezers
- * Magnetic Tweezers
- * Standard biochemical techniques

We can offer projects for advanced undergraduates and postgraduates of the physical/biological sciences to carry out:

- Internships
- Master thesis
- PhD thesis

Requirements:

- Excellent academic record
- Commitment for working at the physics-biology interface
- Good English skills
